(Facilitator)

INTRODUCTION

- Holistic teaching/ training of a concept & its application is incomplete, if it is implemented as a classroom teaching only.
- Therefore, the principles of medical education technology need to be utilized meaningfully to achieve the learning objectives with reference to the teaching of “Health & Hospital Management”.

OBJECTIVES

The student is able to

1. Understand the concept of health, its spectrum & role in promotion of socio-economic development of people & explain with suitable examples.
2. Differentiate between
 - Health and disease management
 - Clinical case report & disease surveillance report
 - Primary, secondary & tertiary prevention

Cont'd

3. Enumerate managerial functions, giving suitable examples of applications in realistic situation.
4. Explain/ demonstrate application of IPC/ counseling/BCC, Doctor-Patient relationship, Communication Needs Assessment, EQ, with appropriate examples. (Behavioral Skills)
5. Identify different leadership styles & explain merits & demerits.

Cont'd

6. Understand data management compilation, analysis & interpretation from existing health & hospital records.
7. Correlate the concept of health & hospital management with existing health programs & hospital services management in the country.
8. Understand the health care system of India & the role of hospital manager in health care system with appropriate examples

Cont'd

9. Explain & enlist statutory, legal & ethical issues in medical practice.
10. Enumerate patient's rights doctor's responsibility & patient welfare schemes.
